**PATENTED HF**  
**MICRO START**  
prevents interference on  
electronic equipment

HF micro start enables easy arc ignition and prevents HF from causing interference with other localized electronic equipment. This a feature commonly found on more expensive machines.

**WELDS STEELS**  
**AND ALLOYS**  
up to 15mm thick

Use the welder in DC mode for steels and AC mode for alloys. All three models also feature MMA (Arc) welding functionality too. These TIG welders will weld almost any metals\*

\* subject to usage of correct gas/rods and torch consumables

**USE WITH A**  
**FOOT PEDAL\***  
\*SOLD SEPERATELY

Foot pedals give you the ultimate in smooth power delivery and control. Weld from minimum amps up to any pre-set maximum of your choice. Ideal for intricate or complicated welds

**FULLY FEATURED**  
**PULSE WELDING**  
adjust frequency, width  
and amperage

Fully featured pulse welding enables the adjustment of width, amperage and frequency, thus reducing heat deformation and providing greater control of the weld pool. Ideal for stainless steel applications.

**ADJUSTABLE**  
**AC SQUAREWAVE**  
**FREQUENCY**

for total weld pool control  
aids travel speed and  
reduces deformation

Adjustable between 20 to 250Hz this allows for quicker travel speed, improved penetration and provides a narrow weld seam. This feature is commonly found on more expensive TIG welders.
